

TS9356 PKT 90, 90/P, 90/PF

Surface applied door closer

Installation instructions:

Pocket door track mount in 90° pocket (PKT 90)

Pocket pivot (PKT 90/P)

3 hour fire-rated pocket pivot (PKT 90/PF)

Contents

Note: Refer to the included drawing for pull side door closer back plate and track mount templating.

Size selection chart

Closer	Door Width Range	Maximum Weight
TS9356 PKT 90	3'-1" to 4'-6"	250 lb

Note

1. Drawing is not to scale.
2. Dimensions are in inches/[mm].
3. Right hand door is shown.
4. Caution: sex nuts are required for attachment of components to unreinforced doors and to wood or plastic faced composite type fire doors, unless an alternative method is identified in the individual door manufacturer's listings.
5. Template is for 75520 pocket pivot.
6. Maximum degree of opening is 90°.
7. Minimum door width is 37".
8. Adjust closer spring tension for proper closing and latching of door.
9. Adequate reinforcement by others required to install track in pocket.
10. Pocket depth is measured from the pull side face of the door at 90°.
11. Requires DORMA EM504 electromagnetic door holder
12. Use closer body style "B" for this installation.
13. Arrows on closer mounting plate point upward.

TS9356 PKT 90, 90/P, 90/PF

Closer setup

⚠ Follow included template to properly prepare door and frame for all accessories of the closer installation.

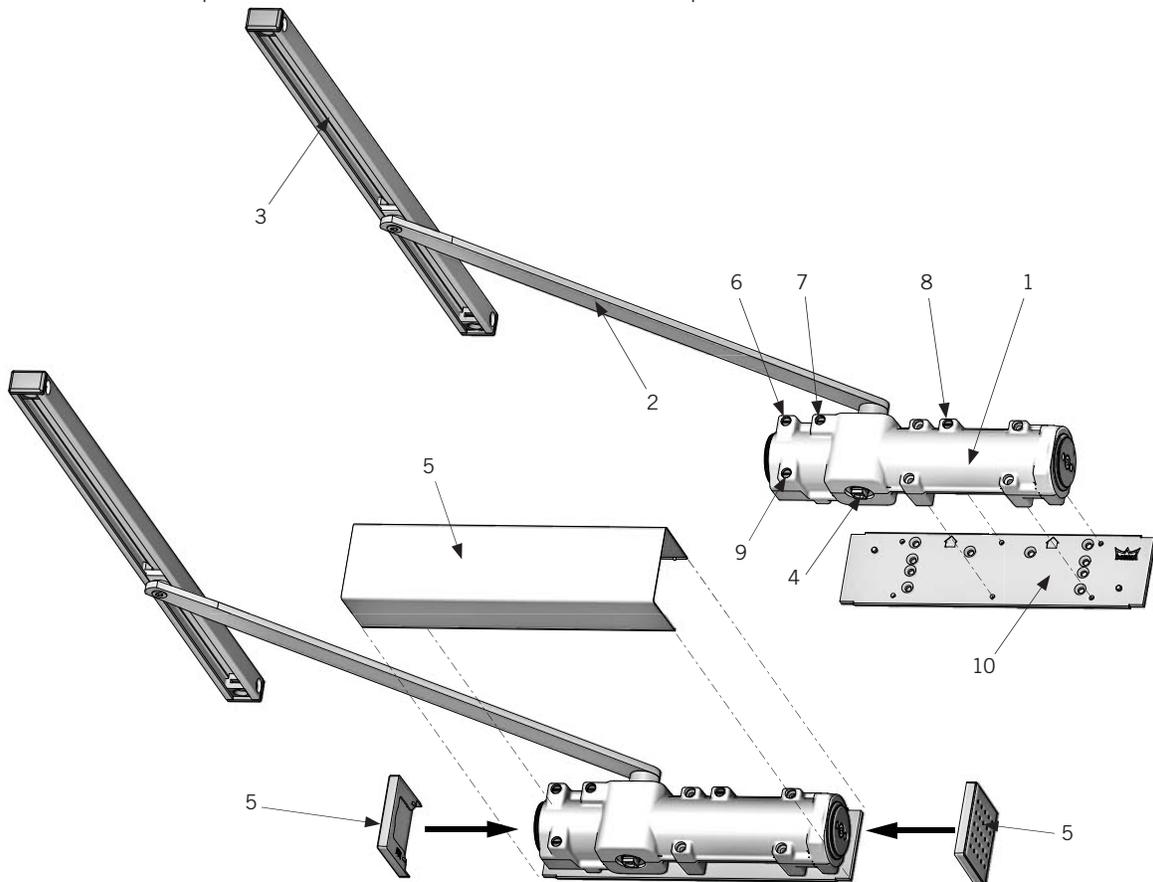

⚠ Make sure door efficiently operates prior to installing closer.

⚠ Know the swing of the door which is being installed prior to installation.

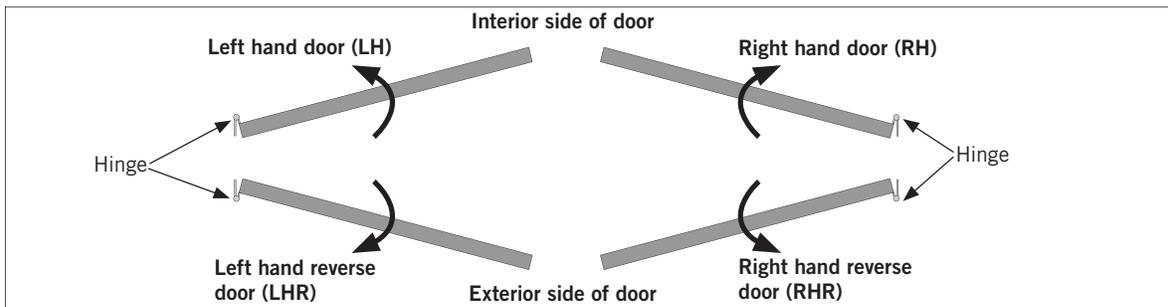

⚠ Verify closer spring size prior to installation. See "Size selection chart" on page 2.

The surface closer is comprised of the following components.

1. Closer body
2. Main arm
3. Track assembly
4. Pinion
5. Cover and end caps
6. Closing/sweep speed adjustment
7. Latch speed adjustment
8. Backcheck adjustment
9. Delayed action adjustment
10. Backplate

Handing of the door

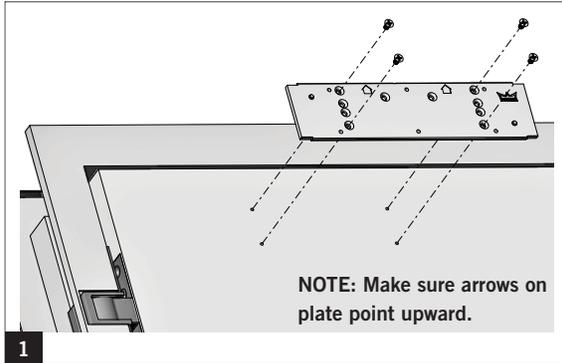

TS9356 PKT 90, 90/P, 90/PF

A. Installing the surface closer

Tools recommended

- Drill Bits
 - Metal: No. 21 & 10-32 Tap
 - Wood: 1/8"
- #2 Phillips screwdriver
- M2.5 & M5 Hex key

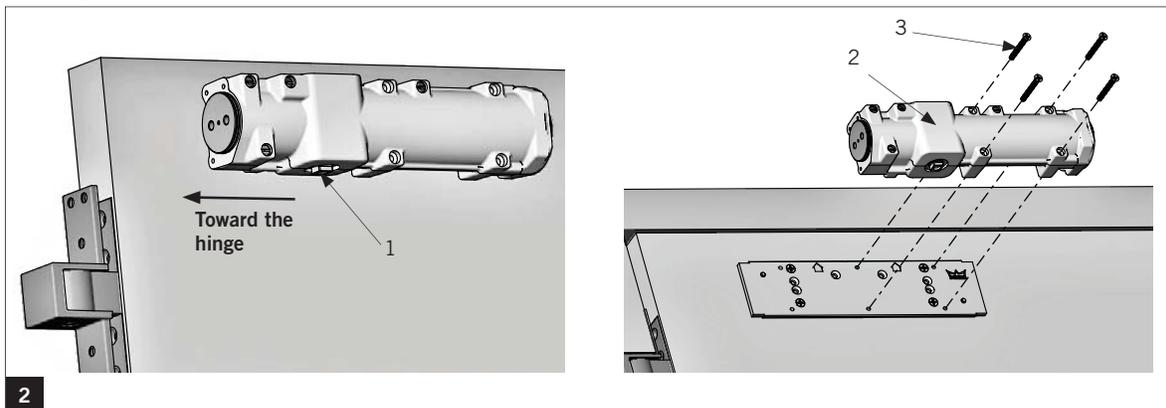

Installing the back plate

Reference template 08279992

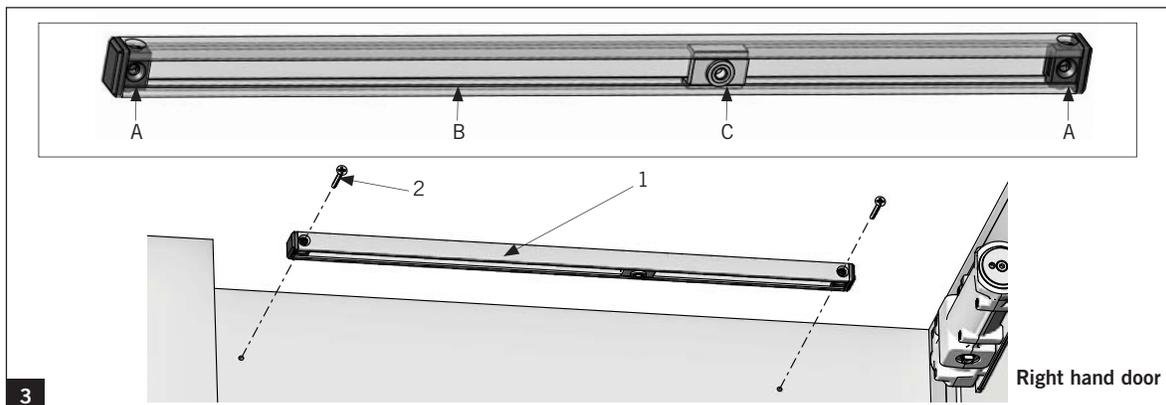

- 1.1** Attach the back plate to the installing surface using the four screws [10-32 machine screws or #10 wood screws] provided with the surface closer.

Installing the surface closer

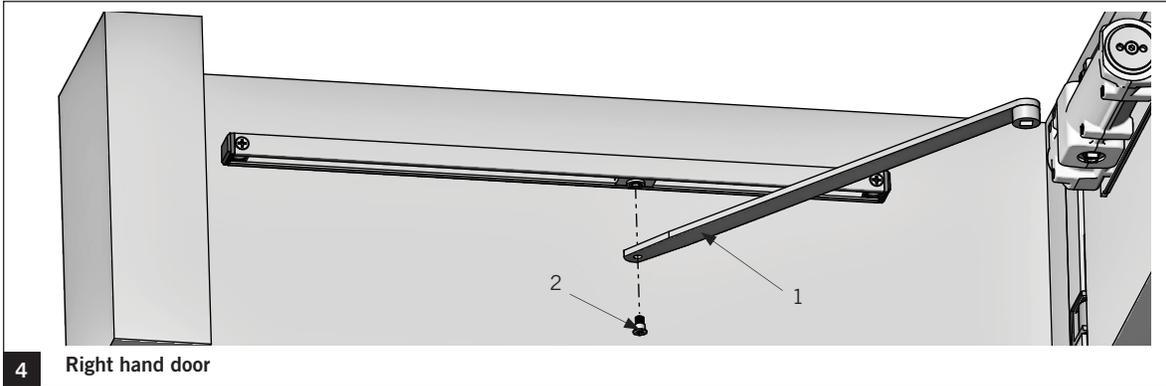

NOTE: Orient pinion (1) closest to hinge.

- 2.1** Secure the closer body (2) to the plate using the four M5x47mm flathead Phillips screws (3) provided with the plate.

- 3.1** Position the individual components inside the track channel (1).
- 3.2** Attach the track channel to the wall through the end blocks with two flat head Phillips screws (2).

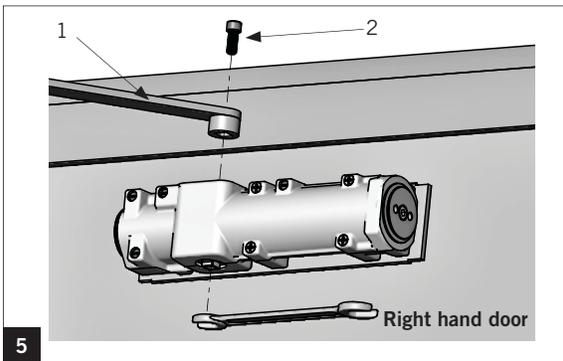

- A.** End block
B. Track channel
C. Slide shoe

4 Right hand door

4.1 Align the arm (1) with the slide shoe of the track channel.

4.2 Secure with one M8x15mm shoulder bolt (2) using an M5 hex key.

5

5.1 With the door closed and using an adjustable wrench (looking up at the bottom of the closer):

- Left hand door - turn the bottom pinion counter-clockwise approximately 5°.
- Right hand door - turn the bottom pinion clockwise approximately 5°.

5.2 Attach the main arm (1) to the top pinion with an M6x20 socket head cap screw (2) using an M5 hex key.

⚠ Be sure that the door is fully closed during application.

B. Adjustments

⚠ Set closer spring size prior to making any closing speed adjustments.

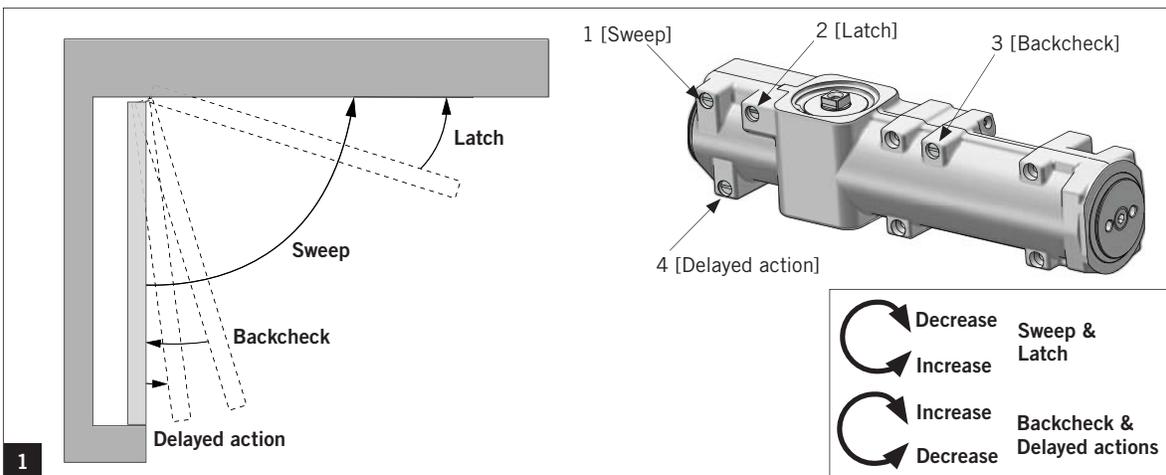

⚠ Do not back valves out beyond closer casting.

⚠ Maximum opening angle is 90°.

⚠ Door should close in 3 to 6 seconds from 90°.

⚠ Do not close valves completely.

Adjusting the closing speeds: sweep, latch, backcheck and delayed action

1

1.1 Adjust the **sweep speed** (1) for the area from 70° - 0°

- Increase sweep speed: Turn valve counter-clockwise
- Decrease sweep speed: Turn valve clockwise.

1.2 Adjust the **latch speed** (2) for the area from 7° - 0°.

- Increase latch speed: Turn valve counter-clockwise
- Decrease latch speed: Turn valve clockwise.

1.3 Adjust the **backcheck** (3).

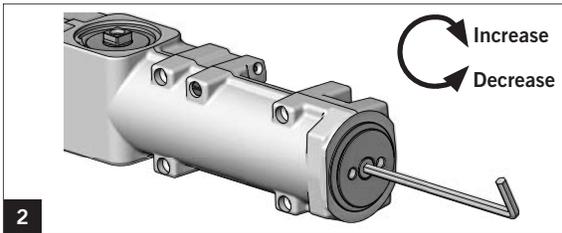

- Increase resistance: Turn valve clockwise
- Decrease resistance: Turn valve counter-clockwise.

1.4 Adjust the **delayed action** (4) for the area from 90° - 70°.

- Increase delayed action: Turn valve clockwise
- Decrease delayed action: Turn valve counter-clockwise

TS9356 PKT 90, 90/P, 90/PF

Adjusting the spring force

DOOR WIDTH		FULL TURNS OF SPRING ADJUSTER	CLOSER SIZE
INT.			
TS9356	4'	0	5
	4'6"	+5	6

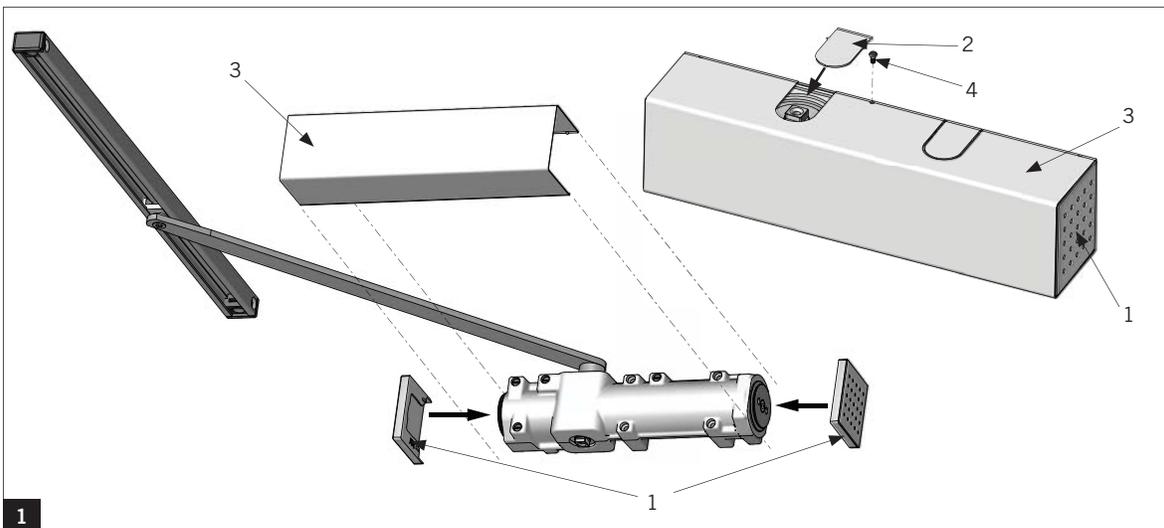

TS9356

NOTE: Supplied with a size 6 spring setting.

- Increase force: turn clockwise 6 times (max)

C. Installing the closer cover

Installing the cover

1.1 Snap both end covers (1) into place.

1.2 Remove the un-needed tab (2), and snap the closer body cover (3) into place.

1.3 Secure with a 4-40 Phillips pan head screw (4) .
