Note: FBB168 & FBB199 are not available with the -66 suffix

1/32 (1/16 clearance between hinge leaves when parallel).

Drill a 0.750 inch diameter hole in the hinge reinforcement to allow the wires and connectors (wire nuts) to pass through freely. A larger hole may be required, depending on connector size.

De-burr both faces of the hole and prime to help avoid damaging wire insulation.

Use a JB-2R Junction Box. See template T90-38R.

NOTE:

Available with both concealed wires and a concealed switch. See template No. T45-19.

CE hinges are available in the following configurations:
