

Wi-Q AMS 3.1

Omnilock 2000 Offline Controller Programming IR Adapter

The Omnilock 2000 offline controllers can be managed in the same software as the Omnilock wireless controllers, Wi-Q AMS 3.1. You will need to use a mini laptop, standard laptop or tablet & the approved USB IR adapter to upload the database or download the history. The device will require the approved Windows operating system for Wi-Q 3.1.

USB IR Adapter-Purchased Directly from Supplier
