# SHELTER™ Fob
## by BEST

## The SHELTER fob by BEST allows you to quickly communicate with the SHELTER wireless system to initiate a lockdown and third-party notification of an event.

The BEST multi-purpose fob allows you to quickly and easily lock down your building via a secure 900 MHz wireless network. With assistance from your integration resource, the SHELTER network components can be configured so the fob initiates a signal to your pre-installed access control system or alarm system, allowing communication with first responders. The simple press of a button can initiate a series of events that make your facility safer and more responsive to emergency situations.

**BEST SHELTER™ helps you create safe spaces within your facility quickly and safely.**
This wireless responsive lockdown solution can be fully configured to adapt to your building and security protocol. With SHELTER, you can be confident your building is ready to respond in any situation. Integrating with first response systems and electronic access control systems, SHELTER can be an essential part of any building security system.
